EXPERIENCE

Shyro Health

Bangalore, India

Software Development Engineer II

Nov 2024 - Present

- Lead a team of **10 engineers**; architected the company's backend infrastructure from scratch, serving **5,000+ members** and **30+ therapists** across **1000+ appointments/month**.
- Drove compliance across **HIPAA, GDPR, DPDP, SOC 2, and ISO 27001**, designing and implementing the technical controls end to end, including encryption at rest and in transit, audit logging, and least-privilege access.
- Built a multilingual AI post-appointment pipeline (**English + 7 Indian regional languages**) that transcribes 1-hour therapy sessions, **redacts PII** before LLM processing, and generates structured clinical notes in **under 3 minutes**, with a **98% clinician acceptance rate**.
- Built an AI therapy chat agent (**500+ conversations**) with real-time crisis detection (e.g., suicidal ideation) and escalation that brings a therapist into the chat; handled **20+ crisis escalations** safely.
- Built a persona-based personalization engine that derives user personas from **30+ behavioral signals** across features (journaling, assessments, AI chat, content engagement) to tailor in-app experiences, increasing **DAU by 35%**.
- Built a PII data vault service that encrypts and tokenizes **30,000+ sensitive fields** for 5,000+ users, isolating PHI and PII from application services.
- Developed a high-throughput event service in **Go** handling **1M+ requests/day**.
- Designed and shipped **15+ backend service modules**: clinical notes, booking and calendar, video calls, assessments, journaling, notifications, content management, and compliance.

Ninjacart

Bangalore, India

Software Development Engineer II

Apr 2024 - Oct 2024

- Engineered an inventory management system with invoice generation, GST portal IRN integration, and credit/debit note processing, using hexagonal architecture and event-driven design.

Software Development Engineer I

Apr 2023 - Apr 2024

- Built a promotional pricing engine driving **80% of daily orders**, handling up to **5,000 orders/min** at **200ms P99** latency.
- Led ONDC protocol integration with external partners (Paytm, Pincode, Magicpin), serving **250,000+ buyers** and **2,000+ sellers**; secured ONDC production sign-off with 100% partner compatibility.
- Implemented the inbox/outbox pattern to sync order data from MySQL to Elasticsearch asynchronously, enabling real-time search with guaranteed consistency.
- Set up observability with Grafana, Micrometer, and OTLP, including custom exception tracking, significantly reducing issue resolution time.
- Added RBAC and a maker-checker workflow to the payment settlement module, reducing manual processing.

Software Development Engineer

Feb 2022 - Mar 2023

- Designed an in-house federated commerce protocol supporting search fan-out, order relay, inventory sync, and multi-tenancy across external systems.
- Redesigned the catalog schema to support **1M+ entries** with Apicurio schema registry; built Elasticsearch discovery APIs that cut response times by **60%**.
- Built a grievance management dashboard automating lifecycle tracking of **5,000+ grievances/month**, reducing resolution time by **80%**.
- Built an organization-wide document generation microservice supporting HTML, Excel, and PDF templates.

TECHNICAL SKILLS

Languages: Java, Go, Python, JavaScript, SQL

Backend: Spring Boot, FastAPI, Kafka, RabbitMQ, Redis, Elasticsearch, GraphQL

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Infra: AWS, GCP, Docker, Linux, Git

Observability: Grafana, Prometheus, OpenTelemetry

AI/LLM: RAG, LangGraph, LLM pipelines, speech-to-text transcription

EDUCATION

Ramaiah University of Applied Sciences

B.Tech, Computer Science & Engineering - CGPA: 9.1

Bangalore, India

Aug 2018 - May 2022
